EXPERIENCE

Fullstack Developer

March 2023 - Present

FiveP/Baret Australia

Melbourne, AU

- Continued development and maintenance of Baret through its spin-off from FiveP into a standalone company, Baret; using .NET, Entity Framework, SignalR, C#, and React.js.
- Developed responsive and interactive front-end features with React.js, ensuring consistent UI behavior and improved usability.
- Improved application stability and performance by proactively resolving bugs, monitoring client environments, and managing Azure resources
- Played an essential role in client data migration initiatives, ensuring accuracy, integrity, and smooth deployment.
- Partnered closely with cross-functional teams to refine requirements, clarify user stories, and deliver scalable, technically sound solutions.
- Enhanced internal tooling, documentation, and development workflows, improving team productivity and reporting efficiency.
- Managed branching strategies and code repositories in Azure DevOps, supporting efficient CI/CD pipelines and collaborative development practices.
- Strengthened team communication by leading discussions, clarifying requirements, and supporting planning sessions with a strong attention to detail.

Mobile Developer

May 2021 - March 2023

Maliksi Creative Technologies Inc.

Mati, PH

- Collaboratively contributed to the development and management of 2 client mobile apps, seeking guidance from senior team members when needed
- Orchestrated streamlined app builds and releases for QA and Team using Firebase App Distribution and Apple Testflight
- Collaborated seamlessly with QA to conduct thorough testing of both client mobile and web apps
- Provided pivotal support to the back-end team in executing a seamless database migration
- Contributed actively to UI/UX design discussions, offering valuable insights for improved design functionality and user experience
- Successfully executed the migration of a client's Flutter app from version 1 to version 2

PROJECTS

Baret

I worked on full-stack development for Baret during its transition from FiveP to its own company, contributing to new feature development in the front-end (React.js) and backend (.NET/Entity Framework) services. My work focused on improving performance, stability, and usability, as well as leading client data migrations and managing Azure environments. I also improved internal tooling and supported CI/CD and branching strategies using Azure DevOps.

SKILLS & INTERESTS

Core Strengths: Attention to detail, Critical questioning / challenging assumptions, Identifying edge cases, Risk and issue anticipation, Requirements clarification, Analytical problem-solving, Strong communication in planning sessions

Frontend : React.js, HTML/CSS/JS, SCSS, TypeScript, Bootstrap, Figma, UI Libraries

Cloud & Devops: Azure, Azure DevOps (CI/CD)

Backend: .NET/C#, Java, Node.js, SQL Server

Frameworks: React, React Native, Spring Boot, Flutter, Laravel

Developer Tools: Git, VS Code, Postman, SourceTree, Github Desktop, Trello, Jira, DBeaver, ChatGPT

Interests: Coding, Crossfit, Exercising, Travelling, Teaching, Saxophone, Pickleball
