SUMMARY

Full-stack developer with 5+ years across React/TypeScript and .NET/Node.js, building multi-tenant SaaS platforms and production mobile apps. Shipped role-based clinical messaging features for an Australian healthcare SaaS product across 7 Azure-hosted client environments used by hospital and frontline teams. Currently sole engineer on 3 production applications (POS, B2B, Payroll), owning requirements through deployment and maintenance. Aligns stakeholders early, surfaces risks proactively, and improves team delivery through internal tooling and CI/CD automation.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, SCSS, HTML/CSS, Bootstrap, Three.js, Flutter, Figma

Backend: .NET/C#, Node.js, Express, Entity Framework, PostgreSQL, SQL Server, Redis, BullMQ, REST APIs, SignalR

Cloud/DevOps: Azure, Azure App Service, Azure DevOps, CI/CD Pipelines, Vercel, Firebase

AI Tools: Claude Code, Codex, DeepSeek

Other: Git, Jira, Postman, Firebase App Distribution, TestFlight

WORK EXPERIENCE

Freelance Full-Stack Developer

Independent | Metro Manila, PH

Jan 2026 - Present

- Shipped 3 production applications (walk-in POS mobile app, B2B client portal, Payroll system) for a services business as the sole engineer.
- Gathered requirements directly from cashiers, payroll staff, and business owners, translating undocumented spreadsheet workflows into a specification and iterating on feedback through rollout, building a React/TypeScript frontend and .NET/C# backend on Azure App Service with Entity Framework and PostgreSQL.
- Accelerated feature delivery by integrating Claude Code into daily development and code review workflows.

Full-Stack Developer

Baret | Melbourne, AU (Remote from Manila)

Mar 2023 - Jan 2026

- Delivered 175+ user stories and resolved 70+ production issues across 7 Azure-hosted multi-tenant client environments with zero data loss and no critical regressions.
- Owned the role-based message routing rules determining which clocked-on users, roles, and teams receive each message, including organization-wide broadcast, implemented in .NET/C# and React over SignalR.
- Reduced manual overhead for a 5-person team through automated testing and CI/CD pipelines in Azure DevOps, internal tooling, and large-scale data migrations with zero data loss.

Mobile Developer

Maliksi Creative Technologies Inc. | Makati, PH

May 2021 - Mar 2023

- Shipped 2 student-facing education apps (GradGuru, MyCoach) to the US market, completing 100+ user stories and resolving 50+ bugs from implementation through release.
- Led the Flutter v1 to v2 migration, resolving breaking API changes with full feature parity and zero production regressions.
- Owned the release pipeline for both apps, shipping QA and stakeholder builds via Firebase App Distribution and Apple TestFlight and partnering with QA on cross-platform testing.

SELECTED PROJECTS

PackPal - AI Travel Packing Assistant | [packpal-scout.vercel.app](#)

- Built "Scout," a real-time AI chat assistant with tool/function calling that adds, removes, and toggles packing items and assigns gear directly from conversation.
- Engineered async AI generation with BullMQ workers and Redis pub/sub, streaming results and tool action events to the client over SSE.

Stack: React, TypeScript, Three.js, Node.js, Express, Redis, PostgreSQL

Integrated Business Management Suite (POS + B2B + Payroll)

- Delivered a Flutter POS app plus a React admin dashboard for revenue analytics, promotions, shift management, and XLSX/CSV/PDF reporting.
- Implemented Philippine-compliant gross-to-net payroll (SSS, PhilHealth, Pag-IBIG, BIR withholding, 13th month) and B2B onboarding-to-invoicing workflows with per-client pricing.

Stack: React 19, TypeScript, SCSS, .NET/C#, Entity Framework, PostgreSQL, Flutter, Dart, Azure App Service

EDUCATION

BS in Information Systems | De La Salle-College of Saint Benilde

Jan 2017 - Jul 2021
